Dear Radiographic Imaging Candidate:

This 2018 Application Information Packet contains information about the application and qualification process for the Radiographic Imaging (RAD) Program at Rhodes State College. The standards of the profession are established by the American Registry of Radiologic Technologists and the American Society of Radiologic Technologists and are regulated by licensure in the state of Ohio. In order to provide a program that promotes student success, it is essential to admit students who meet rigorous curriculum requirements.

Students who wish to be considered for admission into the RAD program must submit evidence of meeting all qualification requirements as outlined in the Application Information Packet by February 9, 2018. Depending on clinical availability, a maximum of 28 traditional and 8 consortium students will be accepted to begin RAD courses during Summer semester 2018. It is the applicant’s responsibility to ensure that all requirements have been met and verified by an academic advisor before submission to the RAD Program Coordinator.

Rhodes State College advisors are available to help you determine if this is the right career path; become a Rhode State College student; answer questions about the qualification process; develop a plan to meet your educational goals; receive appropriate transfer credit; and assist with general education course registration. To schedule an advising appointment, contact the Health Sciences Advisor at 419-995-8001.

Thank you for inquiring about the RAD Program at Rhodes State College. Our program is highly respected for its’ high educational standards, commitment to professionalism, dedicated faculty, and strong professional certification exam pass rates.

We look forward to helping you reach your career goals.

Sincerely,

Andrew Shappell

Radiographic Imaging Program Coordinator
Who Are Radiologic Technologists?

Registered radiologic technologists/radiographers are the medical personnel who perform diagnostic radiographic imaging examinations on patients for interpretation by doctors. They are educated in anatomy, patient positioning, examination techniques, equipment protocols, radiation safety, radiation protection, and basic patient care. They must use critical thinking and problem solving skills on a daily basis, and they must also possess excellent communication and interpersonal skills to interact appropriately with patients, families, coworkers, and other healthcare providers.

Registered radiologic technologists — known as "R.T.s" — must complete at least two years of formal education in an accredited two- or four-year educational program through an academic institution and must pass a national certification examination. To remain registered, they must earn continuing education credits.

The Radiographic Imaging Program at Rhodes State College is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 N. Wacker Drive, Suite 2850, Chicago, Illinois 60606; phone: 312-704-5300; email: mail@jrcert.org; website: http://www.jrcert.org.
Program Mission

The Radiographic Imaging Program prepares competent, professional Radiographers.

Extended Statement of Program Mission

The Radiographic Imaging Program at Rhodes State College exists to provide students with a stimulating environment in which to achieve educational and personal growth while developing a sense of professionalism combined with the technical and interpersonal skills necessary for success as a radiographer/radiologic technologist. In addition, the Distance Education format for the Northwest Ohio Allied Health Consortium students provides surrounding communities with qualified, professional healthcare specialists.

RAD Program Outcomes

Class of 2016

- 100% certification pass rate (100% on first attempt)
- 86% Five-Year Average Job Placement Rate
- 33.3% graduation rate

Admission Requirements

The Radiographic Imaging (RAD) program is a limited enrollment program. The RAD program admits students once per year with a summer semester start date. The deadline for submitting an application to the college and all related qualification documents is February 9th, 2018 at 5:00 p.m. If your application is complete*, you are encouraged to submit it before the deadline.

*Application forms should be accurate, complete and professional in appearance. Application forms with missing components will NOT be considered for review.

The following process will be utilized to qualify students into the program. Each step in Phase I and II is mandatory and must be completed by the above deadline. No exceptions will be granted. It is the applicant’s responsibility to read and understand this application process.

Phase I: College Admissions Process

Step 1    _____  Apply to Rhodes State College. This must be done before applying to the RAD Program. (If you are a Northwest Ohio Allied Health Consortium Education student, please contact Admissions at your partner school.)

Step 2    _____  Submit current transcripts to Rhodes State College.

a. If you are a current Rhodes State College student, your GPA will be calculated using program specific coursework through fall semester of 2017 (See Phase II, Step 3).

b. If you have transferable college credit, request your official transcripts from previous college(s) be sent directly to Rhodes State College, Office of the Registrar, 4240 Campus Drive, Lima, Ohio 45804. Program specific course grades from transferable college credit courses through fall semester of 2017 will be used to calculate your GPA. (See Phase II, Step 3). Note: GPA will be calculated using an average of program specific coursework. Transfer credit in relation to the general education courses will only be considered up to the point of the application deadline.

c. If you are a high school senior, request your official high school transcript to be sent directly to Rhodes State College, Office of the Registrar, 4240 Campus Drive, Lima, Ohio 45804. High School course grades through the first semester of the senior year will be used to calculate your GPA. (See Phase II, Step 3). Note: A High School transcript can only be used for individuals who are high school seniors during the 2017-2018 academic year.

d. If you are a high school senior with college coursework completed through College Credit Plus, your GPA will be calculated using program specific coursework (high school GPA excluded).

e. If applicable, a Certificate of High School Equivalency (GED) should be sent to the Rhodes State College Office of Admissions, 4240 Campus Drive, Lima, Ohio 45804. In the case of a GED report with no accompanying GPA, the student will be required to take college level coursework to establish a GPA.

f. Certain courses required as part of the RAD curriculum must have been completed within the past 5 years. This requirement can be waived by the program coordinator with submission of proof of employment in a health care field. Examples include Medical Terminology and Anatomy & Physiology.
Phase II: Program Qualification Requirements

Step 3  _____  Validate both an overall (college or high school) and calculated GPA of 2.75 or higher. A calculated GPA is defined as the average GPA of program specific coursework (excludes SDE 1010). The following URL can be utilized to calculate the curriculum specific GPA: [http://www.registrar.iastate.edu/students/gpa-calc](http://www.registrar.iastate.edu/students/gpa-calc)

Step 4  _____  Complete the ATI TEAS exam by making an appointment with the Rhodes State College Testing Center. This appointment can be made by going online at [www.atitesting.com](http://www.atitesting.com) and setting up an account. Identifying your state and city will lead you to the prompts for scheduling with Rhodes State College. A minimum score of 60 must be achieved to qualify for the program. The minimum cut score was established based on three years of programmatic data to determine academic preparedness for a Health Sciences major and its corresponding rigor. *(Highest score will be used with a maximum of 2 trials accepted per application period.)*

Step 5  _____  Attend a mandatory program specific orientation session. Register for a date from the options available on the Rhodes State College website (links available on the Advising or Division of Health Sciences page).

Step 6  _____  Complete 16 hours of observation in a clinical setting with a Registered Technologist in Radiography using the Observation Form approved by Rhodes State College.

Step 7  _____  Sign the informed consent packet.

Step 8  _____  Schedule and complete an academic advising consultation/appointment with a Rhodes State College advisor located in the Public Service Building, Room 148. If appropriate, during the appointment the advisor may verify completion of Phases I and II, provide appropriate signature, and forward your application form to the program coordinator.
Phase III: Acceptance

All students who meet the program’s qualification requirements are placed on the qualified list.

*If more than 28 traditional and 8 consortium applicants are qualified, students will be offered a seat based on the qualifying criteria (aggregate of calculated GPA, ATI TEAS score, the number of program specific courses completed with a C or better, and the observation rubric). If the qualifying criteria aggregate score of two applicants is equal then the college application date will be used to rank order those applicants.

Qualified students not in the top 28 traditional or 8 consortium applicant groups will be admitted in a following cohort year. This acceptance is contingent upon re-application prior to the deadline of the offered cohort year to verify continued interest in pursuing the degree. These students will be encouraged to attend an informational meeting on April 5, 2018 (4-6 pm) with programmatic faculty to discuss strategies for persistence within the program or opportunities for other health care majors and/or other career directions offered at Rhodes State College.

Notification of Entry into the RAD Program

Applicants will be notified of their qualification to the program and cohort entry year via the RhodesState.edu email or other designated email address by March 31st, 2018.

If a student declines their seat in the 2018 cohort before May 27th, 2018, the first student on the 2019 cohort list will be offered that seat. This process will continue until all seats are filled.

Pursuant to federal regulations and state law, it is a policy of Rhodes State College that discrimination against any individual for any reasons of race, color, religion, national origin, sex, sexual orientation, qualified disability, age (40 or older), or because he/she is a Vietnam-era veteran or a disabled veteran is specifically prohibited. Accordingly, equal opportunity will be extended to all persons. The College’s admissions policies, instructional programs, extracurricular activities and employment practices will reflect this Nondiscrimination Policy.

The College has appointed the individual listed below as Title IX and Section 504 compliance officers. Students who believe that they have experienced any form of discrimination, including sexual harassment, should contact:

Vice President for Student Affairs
216A Public Service Building
Phone: (419) 995-8439
Personal Information Section

Please note:
It is your responsibility to notify the college and the program coordinator after submission of your application of any address or phone number changes. Failure to keep contact information updated could prevent you from receiving important communication regarding acceptance to the program, which will result in your name being removed from the application list.
Phase I and II Verification of Completion

- Application to Rhodes State College completed
- High School/College transcripts or GED report received
- ATI TEAS exam completed with a 60 or higher
- Program specific orientation/information session attended
- Observation hours completed (16 hours)
- Documentation of Observation Hours received
- Signed Informed Consent Packet verification (see proceeding pages)
- Meets minimum overall and calculated GPA requirement for application (2.75)
- Meets minimum academic requirements for application (see rubric below)
- Contingent application: Currently taking Math 0902 with Math 1151 during Spring Semester 2018. Acceptance contingent upon successful completion of both courses.

DECLARATION:

- I attest that all information on this application is complete and correct.
- I understand that it is my responsibility to confirm that all application materials are received on or before February 9, 2018.

Student Applicant Signature

Date
Please read and sign that you understand the following consent notifications

I. Program Duration

The RAD Program begins in the Summer Semester and is designed to be completed in 78 academic weeks. However, students may take general education courses required for the degree prior to admission. Secondary to the sequencing of the RAD classes, it will take 6 consecutive semesters (a total of 101 calendar weeks) to complete the program regardless of the amount of course work that has been completed prior to admission.

II. Travel to Clinical Sites

Students enrolled in the RAD program at Rhodes State College must complete clinical assignments in conjunction with on-campus classroom and laboratory instruction prior to completion of the program. Clinical assignments for students are arranged so that all students can benefit by learning through a variety of clinical experiences. Students must be prepared to meet the financial obligations associated with the clinical assignment (i.e. – transportation to the facility).

III. Eligibility Qualifications for ARRT Certification

Upon successful completion of the Radiographic Imaging program, the graduate may be eligible to take the Examination in Radiography of the American Registry of Radiologic Technologists (ARRT) according to the following eligibility requirements:

Every candidate for certification and registration must, according to ARRT governing documents, "be a person of good moral character and must not have engaged in conduct that is inconsistent with the ARRT Rules of Ethics," and they must "agree to comply with the ARRT Rules and Regulations and the ARRT Standards of Ethics. ARRT investigates all potential violations in order to determine eligibility. The Rules of Ethics are standards of minimally acceptable professional conduct for all Registered Technologists and applicants. The Rules of Ethics are intended to promote the protection, safety and comfort of patients. Registered Technologists and applicants engaging in any of the conduct or activities noted in the Rules of Ethics, or who permit the occurrence of said conduct or activities with respect to them, have violated the Rules of Ethics and are subject to sanctions as described. One issue addressed by the Rules of Ethics includes convictions, criminal procedures, or military court martial as described here. These include a felony, a misdemeanor, or any criminal procedures resulting in a plea of guilty or nolo contendere (no contest), a verdict of guilty, withheld or deferred
adjudication, suspended or stay of sentence, or pre-trial diversion. Juvenile convictions processed in juvenile court and minor traffic citations not involving drugs or alcohol do not need to be reported. Additionally, candidates for certification and registration are required to disclose whether they have ever had any license, registration, or certification subjected to discipline by a regulatory authority or certification board (other than ARRT). Candidates must indicate any honor code violations that may have occurred while they attended school.

Individuals who have violated the Rules of Ethics may request a pre-application review of the violation in order to obtain a ruling of the impact on their eligibility for ARRT examination. The individual may submit a pre-application form at any time either before or after entry into an approved education program. This pre-application must be requested directly from the ARRT.

The American Registry of Radiologic Technologists
1255 Northland Drive
St. Paul, MN 55120-1155
(651)687-0048
www.ARTT.org

IV. Criminal Background Checks and Drug Screens

To meet the expanding requirements of our clinical affiliates, both criminal background checks and a drug screen will be mandatory prior to clinical experiences for all students within the division of Health Sciences. You are at risk if you have been convicted of a prior felony and/or some misdemeanors. Students with certain felony, misdemeanor, or drug-related convictions will be ineligible for admission into clinical experiences. A criminal record may also prevent you from obtaining a license or certificate in your chosen healthcare profession or to obtain employment post-graduation. The student is responsible for the cost of the BCI and FBI records checks. Students admitted to a program containing off campus clinical/practicum experiences will be required to submit to drug screening. Positive drug screenings will result in dismissal from all clinical courses. Any student who refuses/fails to cooperate, or complete any required drug screening will be considered “positive” and dismissed from the clinical component of their program. All students requiring drug screening may be subject to random drug screens and for cause during the program.

V. Physical Examination

Prior to the first clinical rotation, the student will be required to have a physical examination completed by his/her family physician (or other acceptable healthcare provider), completion of required immunizations, and a two-step TB (Mantoux) skin test. The student is responsible for these costs.

VI. Technical Standards

All applicants for the Health Science Programs must possess the essential skills and abilities necessary to successfully complete the requirements of the curriculum either with or without
reasonable accommodations for any disabilities the individual may have. **Note:** The use of an intermediary that, in effect, requires a student to rely on someone else’s power of selection and observation will not be permitted. The essential skills and abilities for the Health Science Programs are categorized in the following TECHNICAL STANDARDS:

1. **Sensory/Observational Skills:** The applicant must be able to observe a patient accurately at a distance and close at hand. Observation necessitates the functional use of all the senses.

2. **Communication:** The applicant must be able to speak, hear, and observe patients in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications. An applicant must be able to communicate effectively with patients and all members of the health care team. Communication includes listening, speaking, reading, as well as writing.

3. **Motor Skills:** Applicants must have sufficient motor skills to gain access to clients in a variety of care settings and to manipulate and utilize the equipment central to the assessment, as well as general and emergency treatment of patients receiving health science practitioners’ care. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

4. **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** These abilities include measuring, calculating, reasoning, analyzing, and evaluating. Problem solving, the critical skill demanded of health science practitioners, requires all of these abilities. In addition, the applicant should be able to comprehend three-dimensional relationships and understand the spatial relations of structures.

5. **Behavioral/Social Skills and Professionalism:** An applicant must possess the emotional health required for utilization of his/her intellectual abilities. The exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of effective relationships with the patients, are essential skills for health science practitioners. Applicants must be able to tolerate physically taxing workloads, and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of the uncertainties inherent in the clinical problems of many patients. Concern for others, integrity, interpersonal skills, interest, and motivation, are all personal qualities necessary for the practice of health sciences.

6. **Environmental:** All applicants must interact with diverse patient populations, of all ages, with a range of acute and chronic medical conditions. Applicants must be able to tolerate frequent exposure to communicable diseases, toxic substances, ionizing radiation, medicinal preparations, hostile individuals, and other conditions common to the health care environment.
VII. Health Insurance

_Due to potential risks, all Health Sciences students are expected to purchase personal health insurance if they are not covered on a family policy._ Rhodes State College is not responsible for any accidents or illnesses that result from student negligence during experiences in the campus or clinical laboratories.

VIII. Radiographic Imaging Pregnancy Policy

**IMPORTANT NOTE:** A woman is ultimately responsible for her health and that of her unborn child. The first three months of pregnancy are the most critical time relative to exposure to ionizing radiation.

The Nuclear Regulatory Commission’s (NRC’s) regulations on radiation protection require the licensee (i.e., Rhodes State College - Radiographic Imaging Program) to ensure that the dose to an embryo/fetus during the entire pregnancy, due to occupational/educational exposure of a declared pregnant woman, does not exceed 0.5 rem (5 mSv). These exposure levels are 10% of the occupational limit of 5 rem (50 mSv) per year. The National Council on Radiation Protection (NCRP) recommends a monthly equivalent dose limit of 0.05 rem (0.5 mSv) to the embryo/fetus once the pregnancy is declared.

In order for a pregnant worker/student to take advantage of the lower exposure limit and dose monitoring provisions, she must declare her pregnancy to the Program Director in writing along with an estimated date of conception so that the estimated dose to the embryo/fetus prior to the declaration of pregnancy can be determined. The written declaration of pregnancy must be in letter form provided to the Program Director. A woman cannot be required to make this declaration of pregnancy and she may withdraw her declaration of pregnancy in writing at any time. The decision to make a declaration of pregnancy and/or to withdraw the declaration of pregnancy is strictly a woman’s choice and is entirely voluntary. The lower dose limit for the embryo/fetus will remain in effect until the woman withdraws the declaration in writing or the woman is no longer pregnant. If a declaration of pregnancy is withdrawn, the dose limit for the embryo/fetus would apply only to the time from the estimated date of conception until the time the declaration is withdrawn. If the declaration is not withdrawn, the written declaration may be considered expired one year after submission.

Any woman who is pregnant but elects not to declare pregnancy may continue the program without modification.

Any woman declaring pregnancy will follow these procedures:

1. Upon diagnosis of pregnancy, the student must present a written statement from her physician that indicates the expected date of delivery and her fitness for clinical education to the Program Director and the Clinical Coordinator. This statement must be presented within the first month following diagnosis.
2. The student may choose to take a leave of absence during her pregnancy or she may continue with her clinical education. If the student continues her clinical education, she
must present a monthly written statement from her physician stating her fitness for clinical education to the Clinical Coordinator.

3. It is the student’s responsibility to continually check the dosimetry reports. Both the student and the IRRP must initial the dosimetry reports quarterly to verify that they have checked the uniform quarterly dose rate and total accumulated exposure dose.

4. If the student decides to continue her clinical education, she will be expected to participate in all clinical assignments and/or duties, but may request any or all of the following exceptions in their clinical assignments due to their known large occupational dose production:
   a. fluoroscopy
   b. surgical radiography
   c. mobile radiography

5. A student will be allowed to make up any clinical time missed due to pregnancy or immediate post-partum care.

6. Make-up or banking hours will be structured to compensate for loss of clinical experiences during pregnancy.

7. Students are encouraged to bank time in anticipation of missing clinical time during a pregnancy.

IX. Working while in the RAD Program

Some students continue to work while enrolled in the RAD Program, but this is dependent upon work schedule, flexibility, semester schedule, and credit hour load, as well as the student’s learning style and other responsibilities. Students are required to attend all scheduled classes, and must be available for the required full-time clinical education experiences. The RAD Faculty strongly recommend that a student does not work more than 15-20 hours per week while in the program. It is an expectation that a student will spend at least two hours of outside preparation and studying for every contact hour in the classroom and lab per week to pass a course.

X. Academic Standards of the RAD Program

The grading policies of the RAD Program are more rigorous than those of Rhodes State College to ensure student competence prior to clinical assignment. The student must earn a “C” or better in all RAD courses, required science (BIO, etc.) courses, and BHS courses.

Important Information to Follow Prior to Observation

Observation or volunteer experience in a radiographic imaging (x-ray) setting is an essential requirement for application to the Radiographic Imaging Science Program. This is your opportunity to judge your interest in the field and learn more about radiography. Radiographers providing this experience will be requested to verify your participation in writing. The form for the observation is included in this packet. If the observation hours are split between different locations, then copy the observation form so each observation location has a separate form to fill out. Sixteen hours of observation of technologists doing x-ray exams in a clinical setting are necessary to meet minimum application criteria. It is your responsibility to arrange this experience.

1. The observation must be completed in a hospital or large clinic setting so that you will observe a larger number of patients and more types of x-ray exams. You are NOT to observe in areas other than the x-ray/radiography rooms in the radiology/medical imaging departments. NO observations should be done in a radiation therapy, nuclear medicine, magnetic Resonance Imaging (MRI) or sonography area!

2. Call ahead to arrange an appointment for observation. Explain your interest in a career in the field. Note: You may complete observation hours at any facility that is willing to host you so long as you are only observing x-ray/radiography exams.

3. Expect that it may be one to two weeks before the observation time can be scheduled. Most facilities are quite busy and need to plan ahead for observation experiences. Do not wait until the last minute to schedule observation hours.

4. Some clinical settings may have a specific radiographer/technologist designated to coordinate observation experiences; if so, ask to speak to this person.

5. Notify the Radiology/medical Imaging department if you will be late or absent. Be sure to speak directly with the facility personnel or leave a message with the office staff. Reschedule as soon as possible. Avoid canceling at the last minute.

6. Dress professionally. Even though you are not a part of the program at this time, you are still viewed as a representative of Rhodes State College. Please be neat and clean and wear what is considered “professional and/or business wear” by the general public. This includes neat hair and nails and no jewelry or piercings other than in your ears. Specifically, no jeans (of any color), no shirts with advertising or writing on it, no athletic/workout clothing, no sandals, no hats, and nothing sleeveless. It is common to wear dress pants or khakis, polo type shirts, blouses, sweaters, and clean shoes—athletic shoes are acceptable. All clothing should be modest and fit appropriately.

7. It is absolutely unacceptable to use your cell phone during observation. Plan to leave it in your car or turn it off.

8. Be interested. Research the field of radiography (x-ray) prior to observing. Do your homework but don’t be afraid to ask questions to learn. Be sensitive. Some questions may not be appropriate to ask in front of the patient.
9. Be ready to ask questions. However, if the radiographer is involved in a procedure, you may be advised to hold questions until they are completed.

10. Conform to any direction from the facility personnel immediately without question in the clinical setting. You may be asked to leave an exam area if necessary. Wait as directed and ask questions at a later time. Remember that the patient/client is the clinician’s first responsibility.

11. Understand that discussing a patient’s medical history, present illness, diagnosis, prognosis or treatment with other students, friends, or family is a violation of confidentiality. Uphold the patient’s right to privacy. You may be asked to sign a written confidentiality form; take this seriously. It is a legal matter.

12. When observing, be sure to keep interactions related to the scope of radiography/x-ray and the purpose of your visit. Remain professional at all times. If you become involved in a situation which is uncomfortable for you, seek assistance immediately.
Radiographic Imaging Science Observation Form

Student Applicant Name (print) ____________________________ R# _______________________

Phone Number __________________________ Email ______________________________

To the R.T. Evaluator: Thank you for your time in introducing this applicant to the Radiographic Imaging profession. The student is required to observe R.T.(R)s for 16 hours. Upon completion of the student’s time in your facility, please complete the form below to verify hours in the facility and professional characteristics. Your ratings and comments will be used to award points during the application process for the next class of students admitted to the Rhodes State College Radiographic Imaging program. We appreciate your candid opinion.

Observation Dates: _____/_____/_______ to _____/_____/_______ TOTAL HOURS:___________________
(minimum of 16 REQUIRED)
